H. GENERATOR CERTIFICATION							
<p>I hereby certify that the above attached description is complete and accurate for the best of my knowledge and ability to determine that no deliberate or willful omission of composition properties exists and that all known or suspected hazards have been disclosed. I certify that the materials tested are representative of all materials described by this profile. Also, I acknowledge that oil containing more than 1,000 ppm total halogens is presumed to be hazardous waste per 40 CFR 279. However, that presumption can be rebutted by applying my knowledge of my halogen content of the used oil in light of the materials of processes used in my operations. To the best of my knowledge and belief, I certify to VALICOR that our used oils are generated from industrial usage, and we do not mix hazardous waste with our oil. I understand that every time I and or another of our employees sign the non-hazardous manifest or bill of lading, we are re-certifying this rebuttal presumption. In addition, to the best of my knowledge and belief, all information on these forms is a complete and accurate representation of our waste stream(s). I will notify VALICOR in ADVANCE of changes to the waste stream(s). I will comply with all local, state, and federal regulations with regards to your waste stream(s).</p>
